## COMMENT

### Reimagining Finality in Parallel Patent Proceedings

#### INTRODUCTION

Parties may challenge the validity of issued patents in federal courts and before the Patent and Trademark Office (PTO) and its administrative tribunal, the Patent Trial and Appeal Board (PTAB). Recently, the Court of Appeals for the Federal Circuit, which has exclusive appellate jurisdiction over cases arising under the patent laws, has struggled to manage cases contested in parallel judicial and administrative proceedings.

In *Fresenius USA, Inc. v. Baxter International, Inc.*, the Federal Circuit held that a district court's judgment may be modified by an "intervening" judgment arising out of a parallel administrative proceeding unless all issues have been fully adjudicated in the district-court action.<sup>1</sup> This requirement remains controversial. At least five of the court's eleven judges oppose the court's finality rule,<sup>2</sup> and this debate has led to vigorous dissents from panel decisions and denials of petitions for rehearing en banc.<sup>3</sup> Nevertheless, the rule has attracted little academic attention, and commentators that have addressed the rule have analyzed it under formalistic constitutional and preclusion doctrines, ignoring other approaches.<sup>4</sup>

- 
1. *Fresenius USA, Inc. v. Baxter Int'l, Inc. (Fresenius II)*, 721 F.3d 1330, 1341 (Fed. Cir. 2013).
  2. In *ePlus, Inc. v. Lawson Software, Inc. (ePlus II)*, the Federal Circuit, without Judge Chen's participation, denied the plaintiff's petition for rehearing en banc by an evenly divided vote. See 790 F.3d 1307, 1314 (Fed. Cir. 2015) (Moore, J., dissenting from denial of rehearing en banc); *id.* at 1309 (Newman, J., dissenting from denial of rehearing en banc).

(Fresenius III)*, 733 F.3d 1369, 1382 (Fed. Cir. 2013) (Newman, J., dissenting from denial of rehearing en banc); *id.* at 1372 (O'Malley, J., dissenting from denial of rehearing en banc); *Fresenius II*, 721 F.3d at 1347 (Newman, J., dissenting); sources cited *supra* note 2.
  4. See, e.g., Shashank Upadhye & Adam Sussman, *A Real Separation of Powers or Separation of Law: Can an Article I Administrative Agency Nullify an Article III Federal Court Judgment?*,

This Comment argues that none of the arguments for or against the Federal Circuit's finality rule are legally determinative. Given that the current debate need not define the scope of possibilities, I propose a more flexible rule that looks outside the parameters of this debate for a solution. Under the proposed rule, district courts would have the discretion to adhere to their prior remedy decisions despite intervening administrative judgments of invalidity. Such a rule would allow courts both to prevent litigants from abusing administrative challenges and to preserve the viability of injunctions. In addition, the proposed rule would encourage courts to more carefully communicate their decisions. It might also secure approval from those who disagree with the Federal Circuit's constitutional analysis.<sup>5</sup>

Furthermore, courts could implement the proposed rule without waiting for legislative action. Congress could solve the problems identified in this Comment by limiting administrative reexamination<sup>6</sup> or eliminating it entirely.<sup>7</sup> However, such a development is unlikely and would run counter to current congressional trends. The Leahy-Smith America Invents Act expanded, rather

---

25 FORDHAM INTELL. PROP. MEDIA & ENT. L.J. 1 (2014). This emphasis likely results, in part, from the existence of similar debates over stays. See, e.g., Letter from Richard A. Epstein, Professor, N.Y. Univ. Sch. of Law & F. Scott Kieff, Professor, George Washington Univ. Sch. of Law, to the House Judiciary Comm. 12-13 (Mar. 30, 2011), <http://www.scribd.com/doc/57945172/Letter-from-Richard-Epstein-and-F-Scott-Kieff> [<http://perma.cc/X5D8-TUMY>].

5. This Comment largely evaluates desirability from the perspective of adjudicatory efficiency and patent policy. However, the desirability of the proposed rule might also depend on other considerations—for example, whether district court judges or their administrative counterparts are “better” decision makers. This, in turn, depends on the institutional virtues of courts and administrative agencies. See Richard H. Fallon, Jr., *Of Legislative Courts, Administrative Agencies, and Article III*, 101 HARV. L. REV. 915, 935-43 (1988). For example, prominent commentators have questioned whether district court judges are competent to decide patent cases because of their technical and legal complexity. See Kimberly A. Moore, *Are District Court Judges Equipped To Decide Patent Cases?*, 15 HARV. J.L. & TECH. 1 (2001). Nevertheless, assessing these claims is beyond the scope of this Comment.
6. Reexamination proceedings are one category of administrative proceedings through which parties may challenge the validity of issued patents. For discussion, see *infra* Part I. For examples of possible reforms, see Douglas Duff, *The Reexamination Power of Patent Infringers and the Forgotten Inventor*, 41 CAP. U.L. REV. 693, 722-26 (2013); Mark D. Janis, *Rethinking Reexamination: Toward a Viable Administrative Revocation System for U.S. Patent Law*, 11 HARV. J.L. & TECH. 1, 7, 24 (1997); and Raymond A. Mercado, *The Use and Abuse of Patent Reexamination: Sham Petitioning Before the USPTO*, 12 COLUM. SCI. & TECH. L. REV. 92, 155-58 (2011).
7. See Stefan Blum, *Ex Parte Reexamination: A Wolf in Sheep's Clothing*, 73 OHIO ST. L.J. 395, 433-34 (2012).

than limited, reexamination,<sup>8</sup> and subsequent legislative proposals have favored patent challengers.<sup>9</sup> Consequently, courts remain the actors best positioned to address the problems caused by parallel proceedings.

This Comment proceeds in three Parts. Part I describes patent law’s system of parallel judicial and administrative adjudication. Part II analyzes the Federal Circuit’s finality jurisprudence and arguments for and against the court’s adopted rule. Part III proposes an alternative rule and explains its advantages.

## I. PARALLEL JUDICIAL AND ADMINISTRATIVE PROCEEDINGS

Administrative patent validity proceedings have existed for more than thirty years. In 1980, Congress authorized the PTO to conduct *ex parte* reexaminations of issued patents and to cancel claims found invalid.<sup>10</sup> Supporters believed reexamination would “permit efficient resolution of questions about the validity of issued patents without recourse to expensive and lengthy infringement litigation.”<sup>11</sup> Accordingly, the 1980 statute makes reexamination broadly available. “Any person at any time” may request reexamination, and the PTO will grant any request that raises a “substantial new question of patentability” regarding the patent’s novelty or obviousness.<sup>12</sup> The “substantial new question” standard is easily met, and a request may raise a “substantial new question” even if a court has previously considered the prior art references asserted by the request.<sup>13</sup>

---

8. See Leahy-Smith America Invents Act, Pub. L. No. 112-29, § 6, 125 Stat. 284, 312 (2011) (codified at 35 U.S.C. §§ 301, 303 (2012)) (expanding third-party submissions and authorizing the PTO Director to initiate *ex parte* reexaminations).

9. See, e.g., Innovation Act, H.R. 9, 114th Cong. § 3 (2015) (heightening pleading requirements for parties alleging infringement and lowering fee-shifting standards).

10. See Act of Dec. 12, 1980, Pub. L. No. 96-517, 94 Stat. 3015, 3015-17 (codified as amended at 35 U.S.C. §§ 302-307 (2012)). Patents consist of “one or more claims particularly pointing out and distinctly claiming” the patented invention. 35 U.S.C. § 112(b) (2012). Claims may be asserted or canceled independently. Hence, the PTO may find a subset of a patent’s claims invalid without invalidating the entire patent. For an introductory discussion on claims, see 1 DONALD S. CHISUM, CHISUM ON PATENTS § 8.01 (2016).

11. H.R. REP. NO. 96-1307, pt. 1, at 3-4 (1980).

12. 35 U.S.C. §§ 302-303 (2012).

13. See *In re Swanson*, 540 F.3d 1368, 1378-79 (Fed. Cir. 2008). “Prior art” refers to the body of printed publications and other information that existed before a patent’s effective filing date and which may be relevant to the patent’s validity. Novelty and obviousness are assessed in relation to this body of information. See 35 U.S.C. §§ 102-03 (2012). Parties may request reexamination by submitting individual prior art references that they believe are relevant to the validity of one or more of the patent’s claims. See *id.* §§ 301-302.

Ex parte reexamination procedures are procedurally similar to those used in an initial examination.<sup>14</sup> If the examiner finds the patent invalid, the patentee may appeal the examiner's determination to the PTAB and then directly to the Federal Circuit.<sup>15</sup> Requests may be anonymous, and requestors are not precluded from challenging the patent's validity in subsequent proceedings.<sup>16</sup> Rather, the reexamination statute's drafters believed that courts would exercise their stay power to "prevent costly pretrial maneuvering which attempts to circumvent the reexamination procedure."<sup>17</sup>

Between July 1981, when the ex parte reexamination statute entered into force, and September 2014, the PTO received 13,217 requests.<sup>18</sup> The PTO granted ninety-two percent of these requests and changed or cancelled claims in seventy-eight percent of reexaminations.<sup>19</sup> Contrary to the drafters' expectations, requestors commonly use ex parte reexamination as a supplement, not an alternative, to litigation. Parallel judicial and administrative proceedings are common, and thirty-three percent of reexaminations involve patents known to be in litigation.<sup>20</sup> Courts have been reluctant to grant stays in these cases in part because they recognize that the outcome of the reexamination will be unlikely to resolve all litigation issues.<sup>21</sup> Furthermore, appeals may require four or more years to resolve, and resolution of these appeals often does not prevent further legal action between the parties.<sup>22</sup>

Today, ex parte reexamination is not the only, or even the most popular, administrative option for challenging the validity of issued patents. In 2011, the America Invents Act expanded parties' administrative options by creating inter partes review and other adversarial proceedings.<sup>23</sup> Despite the availability of

23. See Leahy-Smith America Invents Act, Pub. L. No. 112-29, § 6, 125 Stat. 284, 299-313 (2011) (codified as amended at 35 U.S.C. §§ 301, 311-319, 321-329 (2012)).

these paths of review, reexamination continues to provide a meaningful avenue for challenging patent validity. While the number of reexamination requests decreased significantly in 2013, after the America Invents Act's review provisions entered into force, this decline stabilized in 2014.<sup>24</sup> Furthermore, inter partes review proceedings might themselves create opportunities for conflicting judicial and administrative judgments. Despite estoppel provisions<sup>25</sup> and strict statutory deadlines,<sup>26</sup> inter partes review proceedings themselves may require nearly two years to resolve, enough time for a district court to enter judgment.<sup>27</sup>

## II. THE FEDERAL CIRCUIT'S FINALITY RULE

### A. The Rule's History

The Federal Circuit's finality rule emerged out of this parallel system of district court and administrative proceedings. In 2003, Fresenius filed a declaratory judgment action against Baxter, alleging that three of Baxter's patents, including U.S. Patent No. 5,247,434 (the '434 patent), were invalid and

---

In 1999, Congress established inter partes reexamination proceedings as an adversarial counterpart to ex parte reexamination. See *Optional Inter Partes Reexamination Procedure Act of 1999*, Pub. L. No. 106-113, §§ 4601-4608, 113 Stat. 1501A-567 to -572 (codified as amended at 35 U.S.C. §§ 311-318 (2000)). The America Invents Act replaced inter partes reexamination with inter partes and post-grant review, see *Leahy-Smith America Invents Act* § 6, and created a transitional program for reviewing "covered business method patents," or patents for "performing data processing or other operations used in the practice, administration, or management of a financial product or service," excluding "technological inventions," *id.* § 18(d)(1).

24. U.S. PATENT & TRADEMARK OFFICE, *supra* note 18, at 1. Some parties might prefer ex parte reexamination to inter partes review to preserve anonymity. In theory, the PTO enforces the America Invents Act's preclusion provisions against ex parte reexamination requestors. See *Changes To Implement Miscellaneous Post Patent Provisions of the Leahy-Smith America Invents Act*, 77 Fed. Reg. 46,615, 46,622 (Aug. 6, 2012) ("If the Office becomes aware of facts that call the certification into question, the Office will determine, on a case-by-case basis, whether the request for *ex parte* reexamination is prohibited by statute."). However, the possibility of anonymous requests complicates these efforts.
25. See 35 U.S.C. § 315(e) (2012).
26. See *id.* §§ 314(b), 316(a)(11).
27. According to data aggregated by Lex Machina, as of March 18, 2016, inter partes review proceedings require, on average, 536 days to reach a final decision, and the longest pending proceeding required 715 days to reach termination. See LEX MACHINA, <http://www.lexmachina.com> [<http://perma.cc/TTC7-R2YW>].

noninfringed.<sup>28</sup> Baxter counterclaimed for infringement.<sup>29</sup> In 2007, the jury awarded Baxter \$14,266,000 in preverdict damages, and the district court further awarded Baxter a permanent injunction and postverdict damages, calculated at a reasonable royalty rate.<sup>30</sup>

In *Fresenius I*, the Federal Circuit affirmed the district court's findings that the '434 patent was valid and infringed, but found the other patents invalid.<sup>31</sup> Accordingly, the court vacated the injunction and postverdict damages award and remanded for "further proceedings consistent with [its] opinion."<sup>32</sup> Significantly, Fresenius did not appeal the district court's *preverdict* damages award, and the Federal Circuit did not expressly vacate this portion of the district court's judgment.<sup>33</sup> The Federal Circuit panel disagreed over the remand order's legal effect. Judges Dyk and Newman concurred separately, attempting to shape the order in opposite directions. Judge Dyk argued that on remand, the district court could stay the litigation pending the resolution of a parallel *ex parte* reexamination proceeding before the PTO.<sup>34</sup> Judge Newman, by contrast, argued that stay would be inappropriate and that "[o]nly an issue of adjustment of damages and a modification of the permanent injunction . . . remain[ed] on remand."<sup>35</sup>

- 
28. See Complaint for Declaratory Judgment of Patent Invalidity and Noninfringement at 4, *Fresenius USA, Inc. v. Baxter Int'l, Inc.*, No. C 03-1431 (N.D. Cal. Apr. 4, 2003).
  29. See Defendants' Answer, Affirmative Defenses and Counterclaims to Plaintiffs' Complaint for Declaratory Judgment of Patent Invalidity and Noninfringement at 6-13, *Fresenius USA, Inc. v. Baxter Int'l, Inc.*, No. C 03-1431 (N.D. Cal. May 14, 2003).
  30. See Order at 2, 6, *Fresenius Med. Care Holdings, Inc. v. Baxter Int'l Inc.*, No. C 03-1431 (N.D. Cal. Mar. 21, 2008), ECF No. 1018; Order at 8-10, *Fresenius Med. Care Holdings, Inc. v. Baxter Int'l Inc.*, No. C 03-1431 (N.D. Cal. Mar. 21, 2008), ECF No. 1019. The Patent Act authorizes damages and injunctions for infringement. See 35 U.S.C. §§ 283-284 (2012). Damages shall be "adequate to compensate for the infringement, but in no event less than a reasonable royalty for the use made of the invention by the infringer." *Id.* § 284. "Preverdict" and "postverdict" damages refer to damages for infringement committed before and after the jury's verdict.
  31. See *Fresenius USA, Inc. v. Baxter Int'l, Inc. (Fresenius I)*, 582 F.3d 1288, 1304 (Fed. Cir. 2009).
  32. *Id.* at 1304.
  33. On remand, the district court denied Fresenius's motion for a new trial to determine preverdict damages on the grounds that the Federal Circuit's remand order vacated the injunction and postverdict damages, but left preverdict damages intact. Order, *Fresenius USA, Inc. v. Baxter Int'l, Inc.*, 2011 WL 2160609, at \*1-3 (N.D. Cal. May 26, 2011) (No. C 03-1431).
  34. *Fresenius I*, 582 F.3d at 1306 (Dyk, J., concurring).
  35. *Id.* at 1305 (Newman, J., concurring).

Subsequently, the district court declined to stay the litigation<sup>36</sup> and proceeded to adjudicate the remaining issues. Simultaneously, the PTO found the claims at issue invalid.<sup>37</sup> While the appeal from the reexamination proceeding was pending, the district court entered judgment for Baxter.<sup>38</sup> The court's judgment preserved the \$14,266,000 preverdict damages award but, in compliance with the Federal Circuit's remand order, reduced postverdict damages.<sup>39</sup>

Baxter's victory was short-lived. The Federal Circuit affirmed the PTO's finding of invalidity.<sup>40</sup> The district court's contrary decision did not bind the PTO "because the two proceedings necessarily applied different burdens of proof and relied on different records."<sup>41</sup> Subsequently, Fresenius appealed the district court's judgment, arguing that although Fresenius would ordinarily be precluded from relitigating infringement and preverdict damages, the Federal Circuit was obligated to apply its own intervening judgment holding the claims invalid.<sup>42</sup>

In *Fresenius II*, the Federal Circuit agreed and ordered the district court to dismiss the action entirely.<sup>43</sup> The court explained that although the district court's judgment was "final for purposes of appeal" and "might have been given preclusive effect in another infringement case between these parties, it was not sufficiently final to preclude application of the intervening final judgment" affirming the PTO's finding of invalidity.<sup>44</sup> "To rise to that level, the litigation must be entirely concluded so that [the] cause of action [against the infringer] was merged into a final judgment . . . one that 'ends the litigation on the merits and leaves nothing for the court to do but execute the

43. *Id.* at 1347.

44. *Id.* at 1341.

judgment.”<sup>45</sup> However, *Fresenius I* “left several aspects of the district court’s original judgment unresolved,” including postverdict damages and injunctive relief.<sup>46</sup> Thus, the court reasoned, under “general res judicata principles governing the preclusive effect of a judgment,” there was “no final judgment binding the parties.”<sup>47</sup>

Judge Newman dissented. In her view, the court’s requirement that all aspects of a judgment be fully adjudicated “violate[d] the constitutional plan” that court judgments “may not lawfully be revised, overturned or refused faith and credit” by other branches.<sup>48</sup> Further, she argued, the court’s decision was “contrary to the precedent of every circuit,” which “impose[d] finality and preclusion” on issues “finally decided in full and fair litigation” even if other issues remained unresolved.<sup>49</sup>

Since then, the Federal Circuit’s decisions have split along similar lines. In *Fresenius III*, the court denied Baxter’s motion for rehearing and rehearing en banc.<sup>50</sup> Judge Dyk concurred,<sup>51</sup> and Judges O’Malley and Newman dissented,<sup>52</sup> reiterating their established positions. In *ePlus, Inc. v. Lawson Software, Inc.*, the Federal Circuit extended *Fresenius II*’s rule to civil contempt orders.<sup>53</sup> The court explained that a contempt finding for noncompliance with an injunction, like a damages award, could not survive an intervening judgment finding the patent invalid.<sup>54</sup> As before, the ruling divided the court. Judges Moore and Newman, joined by Judges O’Malley, Reyna, and Wallach, dissented from the court’s decision to deny rehearing and rehearing en banc.<sup>55</sup>

*B. Arguments for the Current Rule*

Despite continuing controversy, none of the arguments for or against the Federal Circuit's finality rule are legally determinative. Precedent neither requires nor forbids the court's approach.

Proponents of the rule rely heavily on the Supreme Court's decision in *John Simmons Co. v. Grier Bros. Co.*<sup>56</sup> There, the district court ruled for the patentee on patent infringement and unfair competition claims and issued a decree granting a permanent injunction and accounting.<sup>57</sup> The Third Circuit affirmed the unfair competition holding but ruled the reissued patent invalid and ordered the district court to modify its decree.<sup>58</sup>

Subsequently, in a separate case, the Supreme Court found the reissued patent not invalid, and the patentee moved to vacate the district court's modified decree, entered pursuant to the Third Circuit's order.<sup>59</sup> On appeal, the *Simmons* Court held that the decree should be vacated because it was not final.<sup>60</sup> Instead, the Court required the parties to hold an "accounting" to determine the patentee's award for the unfair competition claim.<sup>61</sup> Thus, "there was nothing to take the case out of the ordinary rule that there can be but one final decree in a suit in equity."<sup>62</sup>

Superficially, *Simmons* appears to support the *Fresenius II* court's conclusion that an order is not immune from the application of an intervening judgment if any issues remain unadjudicated. However, its precedential value is suspect. First, the Federal Rules of Civil Procedure, adopted after *Simmons*, abrogated the traditional rule that "there can be but one final decree in a suit in equity" by allowing courts to "direct entry of a final judgment as to one or more, but fewer than all, claims or parties."<sup>63</sup> Second, the *Simmons* decree was much less definitive, in terms of concluding the action, than *Fresenius*'s preverdict damages award. *Simmons* involved an accounting, a multistep procedure involving a court-appointed special master, whose recommendations were subject to objection by the parties and review by the court.<sup>64</sup> Third,

federal appellate review has changed significantly between *Simmons* and *Fresenius*. Caseloads have dramatically expanded, and appellate courts have increasingly entrusted matters of trial management to their district-court colleagues.<sup>65</sup> *Simmons* embodied an earlier attitude, now abandoned, in which appellate courts strictly reviewed district courts' managerial decisions.<sup>66</sup>

### C. Arguments Against the Current Rule

Similarly, the legal arguments against the Federal Circuit's rule do not compel its abandonment. Opponents argue that the rule "violates the constitutional plan," enshrined in Article III, that judgments "may not lawfully be revised, overturned or refused faith and credit by another Department of Government."<sup>67</sup> In other words, they argue, the Federal Circuit's decision to affirm an administrative finding of invalidity, notwithstanding an apparently contrary court judgment, effectively allows the agency to overturn the lower court.

This conclusion is mistaken. First, from a practical perspective, the constitutional objections are inconsistent with settled understandings regarding the differences between administrative and judicial proceedings. In

---

65. See WILLIAM M. RICHMAN & WILLIAM L. REYNOLDS, INJUSTICE ON APPEAL: THE UNITED STATES COURTS OF APPEALS IN CRISIS 3-9 (2013); Pauline T. Kim, *Lower Court Discretion*, 82 N.Y.U. L. REV. 383, 425-26 (2007); Richard L. Marcus, *Slouching Toward Discretion*, 78 NOTRE DAME L. REV. 1561, 1574-1615 (2003); Judith Resnik, *Managerial Judges*, 96 HARV. L. REV. 374, 425-26 (1982).

66. Proponents of the Federal Circuit's finality rule also rely on the court's decision in *Mendenhall v. Barber-Greene Co.*, 26 F.3d 1573 (Fed. Cir. 1994). See, e.g., *Fresenius II*, 721 F.3d 1330, 1341 (Fed. Cir. 2013) (citing *Mendenhall*, 26 F.3d at 1580). There, the Federal Circuit affirmed the district court's judgment of infringement, but remanded "for determination of damages and other issues." *Mendenhall*, 26 F.3d at 1576, 1580. While remand was pending, the Federal Circuit found the asserted claims invalid in a separate appeal. *Id.* at 1577. Subsequently, the Federal Circuit required the district court to apply its judgment of invalidity because the district court's infringement ruling "was not the final judgment in the case." *Id.* at 1578, 1580.

However, *Mendenhall*, like *Simmons*, does not compel the Federal Circuit's current rule. First, *Mendenhall* is distinguishable based on its procedural posture. *Mendenhall* involved an interlocutory appeal from an infringement determination. At the time of the appeal, the district court had not ruled on any remedy, and no issues were fully adjudicated. See *id.* at 1576-77. Thus, even if the Federal Circuit were unwilling to overrule *Mendenhall*, it could adopt the approach proposed in Part III by reading *Mendenhall* in a less expansive fashion than proponents of the current rule urge. Second, *Mendenhall* has little independent precedential value. *Mendenhall* expressly followed *Simmons* and inherited all of its defects. See *id.* at 1581 (citing *Simmons*, 258 U.S. at 89).

67. *Fresenius II*, 721 F.3d at 1347 (Newman, J., dissenting) (quoting *Chi. & S. Air Lines, Inc. v. Waterman S.S. Corp.*, 333 U.S. 103, 113 (1948)).

*Ethicon, Inc. v. Quigg*, the Federal Circuit held that civil and administrative proceedings involve different inquiries because of their different standards of proof.<sup>68</sup> “Courts do not find patents ‘valid,’ only that the patent challenger did not carry the ‘burden of establishing invalidity in the *particular* case before the court’ . . . .”<sup>69</sup> Subsequently, in *In re Swanson*, the court applied this logic to uphold the constitutionality of parallel reexaminations.<sup>70</sup> Second, from a normative perspective, the outcome of the constitutional analysis depends on whether the court’s finality rule is correct. Article III protects *final* judicial decisions from modification.<sup>71</sup> Assuming *arguendo* that a district court’s judgment is nonfinal, constitutional objections fail.

Additionally, opponents of the rule argue that under modern claim and issue preclusion principles, a court’s judgment may be final with respect to issues that are finally decided in full and fair litigation, even if other issues remain adjudicated.<sup>72</sup> However, this argument conflates preclusion and immunity from intervening judgment.<sup>73</sup> These concepts are analytically and legally distinct. Preclusion prevents parties from bringing the same claims in subsequent proceedings; it does not forbid the application of intervening judgments in the original proceeding.<sup>74</sup> Thus, a court may be bound to apply an intervening judgment even if the parties would have been precluded from raising that issue.<sup>75</sup>

68. 849 F.2d 1422, 1429 (Fed. Cir. 1988).

69. *Id.* at 1429 n.3 (first quoting *Panduit Corp. v. Dennison Mfg. Co.*, 810 F.2d 1561, 1569 (Fed. Cir. 1987); then quoting *Envtl. Designs, Ltd. v. Union Oil Co.*, 713 F.2d 693, 699 n.9 (Fed. Cir. 1983)).

70. *See* 540 F.3d 1368, 1379 (Fed. Cir. 2008). Since *In re Swanson*, the Federal Circuit has rejected all invitations to abrogate or narrow this rule. *See, e.g., In re Constr. Equip. Co.*, 665 F.3d 1254, 1256 & n.3 (Fed. Cir. 2011) (citing *In re Swanson*, 540 F.3d at 1376-77, 1379).

71. In *Hayburn’s Case*, the Justices declined to comply with an act directing them to review pension applications. *See* 2 U.S. (2 Dall.) 409, 410-11 (1792). The act authorized the Secretary of War to review those decisions. *See id.* at 410. Although the Court’s holding did not describe the reasoning for its decision, the Court subsequently has described this holding as standing “for the principle that Congress cannot vest review of the decisions of Article III courts in officials of the Executive Branch.” *Plaut v. Spendthrift Farm, Inc.*, 514 U.S. 211, 218 (1995) (citing *Hayburn’s Case*, 2 U.S. (2 Dall.) 409). At the same time, the Court has emphasized that Article III prevents Congress from interfering with *final* judgments. *See e.g., id.* at 223.

72. *See Fresenius III*, 733 F.3d 1369, 1375 (Fed. Cir. 2013) (O’Malley, J., dissenting from denial of rehearing en banc).

73. *See id.* at 1371 (Dyk, J., concurring in denial of rehearing en banc).

74. *See id.*

75. The distinction between preclusion and immunity from intervening judgments is arguably rooted in more than formalism. Finality doctrines generally protect parties from the burdens of relitigation and promote judicial economy. *See* CHARLES ALAN WRIGHT ET AL., FEDERAL

Thus, just as proponents of the rule err in concluding that the rule is legally necessary, opponents of the rule err in concluding that it is constitutionally prohibited.

### III. TOWARDS A DISCRETIONARY ALTERNATIVE

As Part II has argued, neither the arguments presented for nor against the Federal Circuit's finality rule are convincing. In the absence of a legally compelled result this Part recommends that the court replace the rule with a flexible discretionary alternative.

Thus far, the Federal Circuit has analyzed finality in mandatory terms.<sup>76</sup> However, a better approach would be to allow district courts, at their discretion, to adhere to their prior remedy decisions despite intervening judgments of invalidity. Under the proposed rule, the Federal Circuit would allow district courts to declare individual remedy decisions final for the purposes of immunity from intervening judgments, but only if those courts expressly justified their decisions to do so. On appeal, the Federal Circuit could expressly vacate or modify those decisions based on its assessment of the district court's justification. If not expressly vacated or modified by the Federal Circuit's remand order, those decisions would become final. Thus, cases like *Fresenius II* would turn on both the clarity and thoroughness of the district court's remedy order and the clarity of the Federal Circuit's remand order. And unlike in *Fresenius II*, an ambiguous remand order would be construed narrowly, not broadly.<sup>77</sup>

The Supreme Court's retroactivity jurisprudence provides some support for the proposed rule. Generally, discretionary doctrines aimed at promoting finality and efficiency allow courts to depart from their prior decisions if

PRACTICE & PROCEDURE § 4403 (2d ed. 2015). However, immunity might promote other policies, such as comity between adjudicatory bodies. The principles underlying preclusion may not transfer over to immunity from intervening judgments and vice versa.

76. See *supra* Section II.A.

77. Federal Rule of Civil Procedure 54(b) offers a model for how such a rule might operate in practice. Rule 54(b) provides that a district court "may direct entry of a final judgment as to one or more, but fewer than all, claims or parties only if the court expressly determines that there is no just reason for delay." FED. R. CIV. P. 54(b). If the court does not make this express determination, the court's "order or other decision, however designated, . . . does not end the action . . . and may be revised at any time before the entry of a judgment adjudicating all the claims and all the parties' rights and liabilities." *Id.* The proposed rule follows this general structure.

intervening judgments undermine the basis for those decisions.<sup>78</sup> However, in analogous contexts, federal courts have declined to apply intervening changes in law based on fairness concerns. For example, the Court has “refused to apply” intervening changes in law where doing so “would infringe upon or deprive a person of a right that had matured or become unconditional.”<sup>79</sup> While the Court has discussed this principle as an element of statutory retroactivity analysis, it has applied the principle to agency actions, where a party’s rights “matured” under a prior judicial decision before they were extinguished by the agency.<sup>80</sup>

Unfortunately, the Court’s jurisprudence provides little guidance in determining when a right is sufficiently “mature” to justify ignoring an intervening change in law.<sup>81</sup> However, the Court’s recognition of fairness interests suggests that, in at least some cases, district courts would be justified in adhering to their prior remedy decisions, notwithstanding intervening judgments of invalidity. Adherence to a prior remedy decision may be appropriate where it is clear that the accused infringer or third party has abused the reexamination system or where the only outstanding issues involve injunctions.

The proposed rule would have four principal benefits. First, the proposed rule would prevent accused infringers or third parties from abusing the reexamination system. The drafters of the reexamination statute believed that creating an administrative alternative would “greatly reduce, if not end, the threat of legal costs being used to ‘blackmail’ [patentees] into allowing patent

---

78. For example, under general law of the case principles, courts recognize changes in law as one of several exceptions to the rule that courts should adhere to their prior decisions. See *WRIGHT ET AL.*, *supra* note 75, § 4478.

In *Mendenhall*, discussed *supra* note 66, the Federal Circuit held that an intervening judgment of invalidity was one of several “special circumstances” justifying departure from the law of the case. See *Mendenhall v. Barber-Greene Co.*, 26 F.3d 1573, 1582 (Fed. Cir. 1994). The court reasoned that the “public policy of full and free competition” outweighed the competing value of “judicial economy.” *Id.* at 1583. However, this rationale is unpersuasive. Individual decisions are unlikely to have a significant effect on competition, and as the examples below demonstrate, the court’s finality rule also implicates fairness.

79. *Bradley v. Sch. Bd. of Richmond*, 416 U.S. 696, 720 (1974) (citations omitted).

80. See *id.* at 716-17, 717 n.24 (discussing *Greene v. McElroy*, 360 U.S. 474 (1959); *Greene v. United States*, 376 U.S. 149 (1964)). In *Greene v. United States*, the Court refused to apply an intervening agency regulation affecting the claimant’s recovery for wrongful discharge. The Court explained that the claimant’s right to recover “matured” under an earlier version of the regulation, which placed fewer restrictions on recovery. See 376 U.S. at 160.

81. See, e.g., *Landgraf v. USI Film Prods.*, 511 U.S. 244, 268 (1994) (adopting a clear statement rule for statutory retroactivity and largely obviating the Court’s need to elaborate on its earlier statements regarding intervening changes in law).

infringements or being forced to license their patents for nominal fees.”<sup>82</sup> However, the Federal Circuit’s finality rule encourages challengers to pursue their claims in multiple forums and delay litigation while reexamination progresses. Even more troublingly, the rule creates opportunities for third parties to interfere with patentees’ licensing activities. Such parties may threaten to file low-probability, high-consequence reexamination requests to induce patentees to grant transferrable licenses to high-value patents.<sup>83</sup> The low threshold for granting an examination request, combined with the high threshold for litigation misconduct, make this strategy easy to execute.<sup>84</sup>

Second, the proposed rule would preserve the viability of injunctions. Orders involving injunctions are subject to interlocutory appeal<sup>85</sup> and are commonly vacated or modified.<sup>86</sup> Accordingly, injunctions create opportunities for the kinds of delays that, under the Federal Circuit’s finality rule, subject all issues to modification. Faced with this prospect, patentees may be discouraged from pursuing injunctions in cases involving parallel administrative proceedings (or in which parallel proceedings are likely). Yet injunctions are an important remedy. Although injunctions are not always appropriate, “courts have granted injunctive relief upon a finding of infringement in the vast majority of patent cases . . . given the difficulty of protecting a right to exclude through monetary remedies . . . .”<sup>87</sup> Allowing district courts to adhere to prior decisions regarding validity and damages, notwithstanding ongoing litigation over injunctions, would maintain the strategic value of seeking injunctive relief.

Third, the proposed rule would encourage the Federal Circuit and district courts to more carefully consider and communicate the implications of their decisions. *Fresenius II* was controversial, in large part, because the *Fresenius I* panel did not expressly address the district court’s preverdict damages award in its remand order. Judge Newman believed that the Federal Circuit’s remand order, as issued, was limited to the district court’s injunction and postverdict

87. *eBay Inc. v. MercExchange, LLC*, 547 U.S. 388, 395 (2006) (Roberts, C.J., concurring) (emphasis omitted). For practicing entities, which are primarily concerned with preventing competition rather than receiving money, the need for effective injunctive relief is especially acute. See *Janicke*, *supra* note 21, at 50.

damages awards,<sup>88</sup> while the majority subsequently held that the order was broader in scope.<sup>89</sup> In contrast with the Federal Circuit’s finality rule, the proposed rule would encourage clarity. District courts that did not expressly finalize remedies for immunity purposes would lose the protection that finality provides, and the Federal Circuit, if it were unclear about the scope of its remand order, would forgo the opportunity to reopen the district court’s judgment. Thus, the proposed rule recognizes that appellate panels may disagree about how district courts should proceed on remand<sup>90</sup> but discourages them from resolving disagreements through ambiguity.

Finally, the proposed rule might appease critics who believe that the Federal Circuit’s finality rule violates Article III. Specifically, the proposed rule avoids the situation in which an agency would “overturn” a court’s decision by allowing a district court to preemptively decide whether its decision will incorporate a future agency finding of invalidity. While this Comment concludes that these Article III concerns are ultimately meritless,<sup>91</sup> the proposed rule might have a comparative advantage over the Federal Circuit’s approach in securing approval from the opponents of the current finality rule.

Although the proposed rule would allow for the “peculiar result” in which a patent holder “secure[s] damages for infringement of a patent that has been conclusively found invalid by the PTO,”<sup>92</sup> this result is not as strange as it seems. It is well settled that an adjudged infringer may not recover the cost of a final judgment if the patent is subsequently invalidated.<sup>93</sup> Thus, if the Federal Circuit had affirmed the PTO’s finding of invalidity after, rather than during, Fresenius’s thirty-day appellate window, the district court’s judgment would have been unassailable. Whatever the case, the proposed rule’s considerable advantages outweigh its potential peculiarities.

## CONCLUSION

The Federal Circuit’s finality rule, which insists that district court decisions remain open to modification by intervening administrative judgments until all

issues have been finally adjudicated, remains controversial. This Comment assesses the arguments for and against the rule and argues that neither side's arguments are legally determinative. Instead, the court should permit district courts to adhere to prior remedy decisions despite intervening administrative judgments of invalidity. Such an approach would have several advantages. It would allow courts to prevent litigants from abusing administrative challenges, preserve the viability of injunctions, and encourage courts to communicate their decisions more carefully.

Moreover, the proposed rule would draw upon decades of appellate experience. Congress established the Federal Circuit to promote uniformity in patent law. Yet, prominent critics contend that the court's exclusive jurisdiction should be abolished because the court's specialization breeds insularity.<sup>94</sup> Consistent with this critique, this Comment argues that the Federal Circuit would benefit from looking outside of patent law to solve patent law's problems. The court's finality rule is a creature of the court's tendency to search for patent-specific solutions. However, issues concerning parallel litigation are not exclusive to patent law, and over the course of the past century, federal appellate courts have increasingly entrusted these issues—and others involving trial management—to their district-court colleagues. The proposed rule embodies this trust and provides a model for courts to follow in balancing the interests of litigants, courts, and the public.
